

I would like to express my opinion opposing the CBA's attempts to change the Indiana Telephone Privacy Laws. I feel that we should have the right to sign up to avoid these calls and that our privacy should be respected. I do not want to have to "screen" my calls or to be disturbed during family time to tell someone that I am not interested in their phone solicitations. If their want to reach me, then let them send me something in the mail, so that I can respond if I choose to.
